

CS110 · ACTION 6A · REQUIRED WORKSHEET

C# Code Map

Label what the tutorial code does before you change what it says.

or Run the tutorial first.

Follow [Ready to Code Some C# NET](#) in Visual Studio. When the app runs, use this sheet to name the parts. Your final pathway app may replace or extend “Hello World.”

Selected context

Use a technical context · Console Status Check

02 Find the parts.

Visual Studio note: A newer Console App may use top-level statements, which means the compiler supplies the Program class and Main method. Label the parts you can see and write “compiler supplies it” for hidden parts.

```
using System;
```

```
class Program
```

```
{
```

```
    static void Main()
```

```
    {
```

```
        Console.WriteLine("What is your name?");
```

```
        string userName = Console.ReadLine();
```

```
        Console.WriteLine("Hello, " + userName);
```

```
    }
```

```
}
```

Library	Class	Main method	Prompt	Input + variable	Output
---------	-------	-------------	--------	------------------	--------

03 Explain each label in your own words.

Class

A container that groups related code.

Fix or working on a car and the location where its being fixed or being worked on.

Main method

The method where the console program begins.

The program begins where the main creation of the console is created from and allowing other pathways.

Method / function

A named action. In C#, a function inside a class is called a method.

The console.writeline the code for the creation of the program prompt.

Variable

A named place that remembers a value.

The username would remember the beginning value from the start or prompt of the creation of the code or file.

Console.WriteLine

Displays a line of text in the console.

It displays the action and command of the console.

Console.ReadLine

Waits for typed input and returns that text.

It receives the proper function and format of the function its supposed to follow.

04 Trace the data.

INPUT

The learner will type a name.

VARIABLE

The variable () and ; and commands to display.

OUTPUT

It will display the name.

o5 Plan your pathway version.

What will you replace or add after the tutorial app works?

I will add certain descriptions and more action.

Optional ways to go beyond the tutorial

- ☐ Another prompt
- ☐ A decision or conditional
- ☐ ASCII art in the console
- ☐ An image in README.md
- ☐ Another tested feature

o6 Save the evidence.

1. Complete every written section.
2. Select **Print or save PDF**, or take clear screenshots.
3. Place the PDF or screenshots in your GitHub Week6/evidence folder.
4. Commit and push the worksheet with your Action 6A project checkpoint.
